Registration will start at 7:45 a. m.

Location: VA Medical Center – Lebanon

1700 South Lincoln Avenue, Lebanon, PA

~ Education Department – Building 18, Social Room ~

Description:

The goal of this workshop is to meet the needs of mental health professionals who are caring for an array of patients and issues in practice. The first part of the session will address the changing psychosocial needs of geriatric patients. The second half will include information on Critical Incident Stress Debriefing (CISD) following exposure to traumatic events and its relationship to Post-Traumatic Stress Disorder (PTSD).

Learning Objectives:

As a result of attending the workshop, participants will be able to:

- Identify a sociological perspective of baby boomer population
- Assess a number of psychosocial needs of the older adult population including but not limited to spiritual, financial and sexual.
- Identify, analyze, and assess common mental and neurological health-related issues such as depression, dementia, anxiety, suicidality, and bipolar disorder.
- Identify Community Resources for the older adult population
- Describe current criticisms of CISD
- Describe how PTSD develops
- Differentiate between preventative measures and treatment of PTSD
- List alternate models being used in PTSD prevention.

Presenters:

Stacy Dove, L.P.C. has her M.A. in Applied Clinical Psychology. She is a Licensed Professional Counselor who has experience as a Psychological Evaluator and Therapist. Stacy enjoys working with individuals across the lifespan and her current focus areas are in trauma, anxiety, and women's issues.

Ann Sharp earned her MSW at Temple University in 2003. She is a Therapist and Licensed Clinical Social Worker. She was contracted with a local HVAC company to complete a Critical Incident Stress Debriefing after the traumatic death of an employee in 2010. She co-wrote both the Gerontology and Cultural Awareness modules for the Department of Human Services 100 Hour Personal Care Home Administrator curriculum.
